Erik Hub

ARGENTINIAN - GERMAN

DATA ANALYST

Hello World!! I'm Erik, a 26 year old junior pythonista that is developing his skills in Data Science. With a solid marketing background and some logistics experience, now I'm looking for a new formal start in the tech industry.

A logistics & SCM dropout turned marketer (Businesses Management and Marketing) from the Córdoba National University. I'm freelancing for a variety of local small business.

Now, I'm working towards a full-time career in DA, and looking for moveing back to Europe, but this time with my partner.
